The sum of \$1,408,252.60 was paid on account of bounties on iron and steel and \$130,469.53 was paid in connection with the South African contingents and Halifax garrison.

At the close of the fiscal year the balance at the credit of the depositors in the Post Office and Government savings banks amounted to \$60,771,129.25, an increase of \$2,333,140.55 over the balance held on June 30, 1902; part of this increase, \$1,729,-292.81, represents interest added to the various accounts, and the remainder, \$603,-847.74 the excess of receipts over withdrawals.

In accordance with the terms of the Act 3 Edward VII., Chapter 62, the Minister of Finance and Receiver General is required to hold, for the purpose of securing the repayment of deposits made in the Post Office and Government savings banks, an amount in gold or in gold and Canada securities guaranteed by the Government of the United Kingdom equal to not less than 10 per cent of the total amount at the credit of the depositors. The terms of the provision have been carried out, and statements published from month to month in the *Canada Gazette* showing the state of the reserve.

The demand for the \$1 and \$2 Dominion notes still continues, as will be seen from the following table showing their circulation at the end of September and October for each year from 1896:

SESSIONAL PAPER No. 2

A change was made by the legislation of the last session of Parliament whereby the limit of issue of Dominion notes, for which the security of twenty-five per cent gold and securities of Canada guaranteed by the Government of the United Kingdom is required to be held as reserve, was increased from twenty to thirty millions of dollars. For issues beyond this latter sum dollar for dollar in gold has to be held in the treasury. The reserve thus released enabled the Department to provide for the ten per cent reserve required for the amount of savings bank deposits before referred to.

Investments on account of the sinking funds of the various loans were made during the year to the amount of \$2,620,588.46, making the total amount held on this account on the 30th June, \$53,494,588.32.

The net debt of the Dominion at the close of the fiscal year was \$261,606,988.87 being a reduction from the previous year of \$10,222,100.75, the details of which are as follows :—

Capital expenditure on railways, canals and public works.....	\$6,174,958 98
Capital expenditure on Dominion lands.....	449,542 20
" on Militia.....	428,223 40

	\$10,222,100 75

The average rate of interest paid on the gross debt for the year was \$3.02 as compared with \$3.09 in the previous year, and the net rate of interest paid has fallen from \$2.57 to \$2.47.

While the net debt shows a decrease of \$10,222,100.75 on the 30th June last, it is well to bear in mind that of this reduction the sum of \$3,305,450.24 is represented by a decrease caused by a readjustment of the assets and liabilities in connection with the settlement of accounts outstanding since Confederation between the Dominion and the Provinces of Ontario and Quebec. The reduction in the net debt resulting from the ordinary business of working of the year was therefore \$6,914,126.01.

The accounts between the Dominion and the provinces of Ontario and Quebec arising out of Confederation, and that have for so many years been in process of adjustment, have, I am glad to say been brought to a closing point. Since the issue of the

3-4 EDWARD VII., A. 1904

last Public Accounts a settlement has been arrived at with the province of Quebec, and copies of the accounts with the two provinces will be found printed herewith.

There remains nothing more to be done by the arbitrators so far as arbitration of accounts is concerned.

Three questions however are at issue between the Dominion and the provinces. The first is that of the claim of the Dominion against the province of Ontario under Treaty No. 3. The papers in the case have been filed with the Exchequer Court, to which tribunal it was agreed the matter should be referred, and I expect the case will come to a hearing in the early summer. The second point at issue concerns the three funds set forth in the balance sheet of the Dominion, namely, the Lower Canada Superior Education Fund, the property of Quebec, and the Upper Canada Grammar School Fund and Upper Canada Building Fund, the properties of Ontario.

The Dominion Government has paid interest at the rate of 5 per cent on these funds to the two provinces, while from the provinces, on the indebtedness due the Dominion, the rate of 4 per cent has been received. The Dominion Government, after reference to the Department of Justice, has given notice that on the 1st July, 1904, these funds will either be paid over to the respective provinces, or the rate of interest payable reduced to 4 per cent. The province of Ontario claims that the rate cannot be reduced, and that the funds cannot be paid off. This conflict of opinion may have to be brought to a settlement by the court.

The third question is one relating to what is known as the Yule Bridge. This claim was made by representatives of the Yule family for the value of a bridge over the Chambly River. The bridge was built upwards of sixty years ago. The terms of its construction were that the Yule family should have possession of it and exact tolls on traffic over it for fifty years, after which the bridge itself was to become the property of the then province of Canada, its value to be settled by the courts. The case was submitted to the Exchequer Court which gave judgment in favour of the Yule family for \$36,810.82. The Dominion as representing the old province of Canada satisfied the judgment and proceeded to apportion the amount between the two provinces of Ontario and Quebec. The province of Ontario claims that as the bridge is situated in the province of Quebec the amount should be paid in full by that province. Quebec claims that, the bridge being the property of the old province of Canada, the Dominion should assume the payment, inasmuch as the Dominion took over the assets and liabilities of that province at Confederation. In order to advance the settlement of the matter, when the payment of the last half year's subsidy was being made the provinces, a proportionate deduction was made from the amounts payable the provinces of Ontario and Quebec to cover the judgment in this matter. As the provinces object to that method of dealing with the amount reference to the court may be necessary to determine where the liability lies.

Statements are submitted showing the aggregate receipts and expenditure of the Dominion, year by year, from Confederation to June 30, last.

A statement will be found appended giving the number of officers subject to the Civil Service Superannuation Act. The number has fallen from 2,520, in 1902, to 2,396, in June last.

SESSIONAL PAPER No. 2

No interest has been received during the year on account of the following investments :—

Albert Railway Company.
Three Rivers Harbour Commission.
Quebec Harbour Commission.
Fredericton and St. Mary's Bridge Co.
Montreal Turnpike Trust.

A year ago in my report on the Public Accounts of the year 1902, I made some reference to the close of my career as a public servant which at that time I thought was near at hand. At your request I have remained in the Department until the present, and it is understood that at a very early day I am to be released from further service.

It has always been a pleasure to me to make mention of the assistance I have received from the members of the staff of the Department. I again publicly recognize the zeal, devotion to duty, and intelligent interest they have displayed in the work of the Department during the year under review.

I have the honour to be, Sir,

Your obedient servant,

J. M. COURTNEY,

Deputy Minister of Finance.

IN THE EXCHEQUER COURT OF CANADA.

BETWEEN:—

THE DOMINION OF CANADA,

AND

THE PROVINCE OF ONTARIO.

RE CONTROVERSY AS TO THE DATE FROM WHICH INTEREST IS TO BE PAID BY ONTARIO TO THE DOMINION UPON THE BALANCE FOUND DUE FROM ONTARIO TO THE DOMINION BY THE AWARD OF THE ARBITRATORS DATED 1ST AUGUST, 1900

In August 1894 an agreement was concluded between the parties whereby the Province of Ontario agreed to pay interest at the rate of four per centum per annum upon the balance that should, in certain proceedings by way of Arbitration mentioned in this case is whether it was a term or condition of that agreement that such interest should be computed from the first day of July, 1894. If so, Ontario is entitled to the judgment of the Court; if not, judgment should go for the Dominion.

By the terms of the submission under which, and subject to certain statutes referred to in the case, the arbitration was being proceeded with the arbitrators were to bring down and extend the accounts submitted to them to the 31st day of December, 1892 inclusive. That is, the balance was to be struck as of that date. The arbitrators had power to make, and made from time to time a number of awards dealing with different matters submitted to them. The first award made and set out in this case, was published on the 2nd of November, 1893. By that award, it was among other things, provided that certain trust funds belonging to the Province of Ontario and Quebec should be treated as intact and unimpaired and that interest thereon at the rate of five per centum per annum should be carried half-yearly into the separate accounts of Ontario and Quebec; that the Province of Canada account should be made up at simple interest at the rate of five per centum per annum; that in the separate accounts of Ontario and Quebec these provinces should respectively be allowed simple interest on any balance from time to time existing in their favour, at the rate mentioned (except where some other rate had been expressly agreed to); and that the question as to whether or not the Dominion should be allowed simple interest at the rate mentioned on any balance that might from time to time be found to exist in its favour in the separate accounts of Ontario and Quebec should be reserved for further argument. That question was not decided until August 31st, 1894, when the award dealing therewith and set out in the present case was made. By another award, also set out in the case, published on the 1st of August, 1900, the balance due on the 31st December, 1892 by the Province of Ontario to the Dominion of Canada, apart from the trust funds mentioned, and subject to some matters not disposed of, was determined to be \$1,815,848.59. The contention of the Dominion is that interest on this sum at the

rate of four per centum per annum should be computed half-yearly from and after January 1st, 1893. The contention of Ontario on the other hand is that such interest should, as a result of the agreement come to between the parties, be computed half-yearly from and after July 1st, 1894, the difference between the two contentions being represented by a sum of \$113,176.54.

Between the dates of the two awards first mentioned, that is, between the 2nd of November 1893, and the 31st of August 1894, the correspondence took place, out of which arose the contract or agreement now in question. It was commenced by letters dated the 21st of December, 1893, from Mr. Courtney, the Deputy Minister of Finance to the Treasurers of the Provinces of Ontario and Quebec, in which attention was called to the state of the accounts between the Dominion and the Provinces as affected by the award of November 2nd, 1893. It appears from the correspondence (see Sir Oliver Mowat's letter of December 28th, 1893 in answer to Mr. Courtney's) that the accounts that had from time to time been prepared and which had been submitted to the arbitrators showed balances in favour of the Province of Ontario apart altogether from the trust funds referred to; and I think it is a fair inference from what appears in the case that at the time this correspondence opens it had come to be known that apart from such trust funds the balance of account would be in favour of the Dominion for a large sum.

As has been observed, the Arbitrators had by their award directed that these trust funds should be treated as intact and unimpaired. It is obvious that this direction should be read in the connection in which it occurs, and that its primary object and purpose was to prescribe a rule to be followed in the computation of interest in taking accounts which by the terms of the submission were to be brought down to the 31st of December, 1892. Whether such funds, or any of them, were held by the Dominion on terms that prevented it from paying them off at any time at its will, or if not, whether the Arbitrators intended, or if they so intended, whether they had authority to attach any such condition to the terms on which such funds were held, are questions outside of the present enquiry. What is evident from the correspondence printed in this case is that in December, 1893, there was some question as to the right of the Dominion to pay the provinces the amount of these funds and so get rid of the obligation to pay interest thereon at the rate of five per centum per annum.

Briefly then, the circumstances under which the correspondence opened, were these:—An Arbitration was proceeding upon accounts that showed on the face of them that apart from certain trust funds the Dominion was indebted to the Provinces of Ontario and Quebec. In the course of these proceedings it had become apparent that on a proper taking of the accounts the balances would be the other way, and there seems to have been some question whether or not these trust funds could be brought into account to lessen or discharge such balances. Moreover, the question of the Dominion's right to interest on such balances had not then been determined. Under these circumstances Mr. Courtney, writing for the Government of Canada, stated in the letters referred to that while it was contended on behalf of the Dominion that the Dominion should be awarded interest upon these balances, the right to such interest, so far as the past was concerned, was still a matter for determination, but as to the future it was deemed prudent and advisable that an understanding should be come to with regard to interest upon the balances in favour of the Dominion which would avoid any further misunderstanding or difference; and he proposed to the treasurer of each province that the province should agree to pay to the Dominion from the first of January then next (1894) simple interest at five per cent upon the balances in account then standing in favour of the Dominion, until such balances should be discharged by the Province, or in the event of the Province failing so to agree the subsidies to which it was entitled should be applied in reduction and payment of such balances. No conclusion was arrived at upon that proposal. Action was eventually deferred until the July subsidies were about to fall due when the question was again raised. And here it may be convenient to observe that while the Province of Quebec is not a party to this case, and is in no way bound by any conclusion that is come to, it is necessary to refer to the

SESSIONAL PAPER No. 2

correspondence on this subject that took place between the Dominion and that Province and which was made the basis of the agreement come to between the Dominion and Ontario.

On the 4th of June, 1894 Mr. Courtney, in a letter to Mr. Machin, the Assistant Treasurer of Quebec, referring to previous correspondence, asked to be informed whether the Province of Quebec was willing to agree to pay the Dominion simple interest, at five per cent, upon the balances in account standing in favour of the Dominion, until such balances should be discharged by the province, or in the event of the province failing so to agree the subsidies should be applied in reduction and payment of such balances. Passing over some correspondence that is not material now to the question in issue it will be found that in a letter of the 26th of June, 1894, Mr. Taillon, Premier and Acting Treasurer of Quebec wrote to the Minister of Finance that the financial position of the Province of Quebec was such that it would absolutely require the half-yearly subsidy to enable it to meet its engagements, and rather than fail in these his government was prepared, in the event of the Dominion insisting upon exerting its power to retain the subsidy, to agree to a rate of interest to be computed upon any balances which might as a result of the Arbitration then in progress, be established to exist in favour of the Dominion by the province on the general account from the 1st of July proximo; and he suggested that three and a half per cent per annum, being the rate of interest on the last issue of Dominion securities, should be the rate fixed upon and paid until such balances were discharged by the province, it being fully understood that Quebec under any circumstances should not be placed in any worse position than the Province of Ontario. To that letter, Mr. Courtney, on the 29th of June, 1894, answered that the arrangement could not be closed at a rate of interest less than four per cent. By a telegram of the 2nd of July, 1894, Mr. Taillon agreed to the rate of four per centum, and promised a letter confirming his telegram. On the 6th of July, 1894, Mr. Machin, in a letter to Mr. Courtney acknowledging the receipt of a cheque in payment of the half-yearly subsidy and interest on trust funds stated that he was directed to confirm Mr. Taillon's telegram of the 2nd and added that 'this determines the rate of interest to be paid by the province on any balances that may be established by the arbitration as existing in favour of the Dominion at the 1st of July instant at four per cent per annum.'

It is not necessary, I think, to go through the correspondence on the same subject between the Dominion and the Province of Ontario. Mr. Taillon's telegram of July 2nd, 1894, and an extract from Mr. Machin's letter of the 6th of that month were communicated to Sir Oliver Mowat, and Ontario on the 18th of August, 1894, by a letter from the Acting Deputy Attorney General of that province to the Acting Deputy of the Minister of Finance accepted the same conditions as Quebec in respect to the payment of the subsidy. I refer also to Sir Oliver Mowat's letter of the 26th of July, 1894 to Sir John Thompson, in which he states that he understood that the subsidy due to Quebec on the 1st of July had been paid on the consent of the government of that province to pay interest at four per centum per annum on any balance found to be due to the Dominion, such interest to be reckoned from and after 1st of July, 1894, and he offered on behalf of Ontario to accept the subsidy on these terms.

Now, as has been observed, the question for determination is whether or not it was a term or condition of the agreement come to that the interest at the rate of four per centum per annum on the balances mentioned should be paid from the 1st of July 1894; and that question of fact should, it seems to me, be answered in the affirmative. Mr. Courtney on behalf of the Dominion was the first to name a day from which the arrangement then proposed should take effect. When later he renewed the negotiation he did not mention any date, but Mr. Taillon in his reply, and Mr. Machin in his letter confirming Mr. Taillon's telegram did, and no question having been raised as to that matter, the Dominion must, I think, be taken to have accepted and agreed to the date proposed by Mr. Taillon. Mr. Courtney's letters of December 21, 1893, left the question of one year's interest on the balances of the accounts as they would be found to exist on the 31st of December 1892, to be determined in some way other than by the

arrangement or agreement then proposed. Why the proposal was made in that form does not appear. It may be that it was thought at the time that the Arbitrators could deal with all the past to which reference was made, or that any rule as to interest on such balances which they should prescribe would apply until the parties agreed to some other rule. Or it may be that the matter was left to the operation of law to be determined in any appropriate manner. The latter view of the matter would raise the question as to whether, apart from any agreement, the Dominion would be entitled to interest at the legal and current rate of interest on the balance found in its favour. That question is not raised now, and it may be that the agreement that was come to stands in the way of its being raised at any time. As to these questions it would not be proper for me to express any opinion, and I express none. One thing, however, is clear,—the proposals made in 1893 contained no provision in respect of interest prior to January 1st 1894, on the balances mentioned. Then the agreement come to with the Province of Quebec in July, 1894 left the interest prior to the first of that month to be settled and determined (if at all) by reference to considerations other than those arising from the agreement of the parties. That agreement was, I think, operative from the 1st of July 1894 and not before that date. If so, no interest could be payable under it prior to that time, and therefore I am unable to agree with the contention set up by the Dominion that it is entitled by virtue of this agreement to interest at the rate mentioned on the balance in its favour from the 31st of December 1892, to the 1st of July 1894. On the other hand, with respect to any claim now made for the payment of interest based on the agreement of the parties, I agree with the contention of the Province of Ontario that it is so payable from the 1st of July 1894 only. And I understand this case to be limited to that question, and not to go beyond it; the question being briefly on the one hand whether the parties agreed to a rate of interest only; or on the other hand not only to such rate, but also to a date from which it should be computed. That, from paragraphs five, six and eleven of the case, and from the arguments of Counsel, I understand to be the only question submitted for decision. And confining my answer to that question I agree with the contention put forward on the part of the Province of Ontario, and I think that judgment should, on that issue, be entered for that Province.
